World Youth
Parliament
for Water

Developed by the Executive Secretariat of the 9th World Water Forum, the Swiss Agency for Development and Cooperation (SDC), the International Secretariat for Water (ISW), the Association of Young Water and Sanitation Professionals of Senegal (AJPEAS) and the World Youth Parliament for Water (WWP), the Youth Space is a place where ideas and solutions converge across generations, sectors and countries.

This space will offer young people from all over the world the opportunity to work together to strengthen their capacities on major water-related issues and to unite in order to bring about the necessary transformations that our societies and our planet need to guarantee a sustainable and equitable present and future.

The efforts are all converging on activities and exchanges that will enable youth to acquire the skills necessary to advocate their messages to decision makers and within the 9th World Water Forum processes while defining priorities and a common action plan. The World Water Forum in Dakar is intended to be the catalyst for a global youth water movement that will take the necessary actions at the local, regional and global levels.

The Youth Space will have 4 main areas:

- an exchange and dialogue arena, including an area for presentations and conferences, coworking and networking spaces, and spaces to promote dialogue between stakeholders;
- an interactive learning lab that includes learning courses or workshops for school classes and youth groups;
- an exhibition area on thematic content;
- an incubator, allowing the presentation and dissemination of projects led by young people and the co-creation of (new) solutions.
